

Social Audit Preparation Training

Suppliers worldwide are required to complete social audits, such as SMETA, BSCI, SA8000, etc., to comply with international trade requirements. However, more often than not there is no clear explanation regarding how these audits can benefit the business and what the audit will cover. Therefore, the Partner Africa Audits Department will be hosting a virtual training course on Ethical Trade & Social Audit preparation.

This virtual training session aims to improve suppliers' understanding of these audits' business benefits and explain and prepare you to meet the ethical audit requirements. Our approach is interactive and participatory to ensure peer-to-peer learning and the retention of knowledge.

Who should attend?

- Plant/factory/farm managers
- HR managers/ payroll managers
- SEQ/QA managers
- Managers responsible for social compliance in the workplace

What will be covered?

- Human Rights Due Diligence and the role of Social Audits
- The Social Audit process
- Implementing Social Compliance principles
